CHI Health Expands Banyan's Corridor Platform to Include Pathology

Omaha, NE (May 2015) Catholic Health Initiatives Bergan Mercy Medical Center has once again selected Banyan Medical Systems (BMS) as their integration partner to streamline collaboration between the OR and Pathology. This complex workflow is oftentimes a time bottleneck that can be the difference between ending on time or late. The Corridor™ solution will enable immediate access and collaboration between the two departments, saving valuable time.

CHI is a long-time enterprise software partner of Banyan. Prior to this project, Corridor™ is being used across dozens of general operating rooms, spine/neurological ORs, cardiovascular ORs, a hybrid OR, cardiac cath labs and for patient fall prevention.

About

Banyan Medical Systems, Inc. located in Omaha, NE, is a healthcare transformation company who has created Corridor™, the world first care delivery platform. Corridor™ is a technical platform that enables healthcare institutions to eliminate the barriers of access, collaboration and coordination across the enterprise and fundamentally change the way they deliver care. Corridor™ is being utilized across all types of procedural spaces, such as surgical services, interventional cardiology and interventional radiology, as well as in the patient room for the purposes of fall prevention and enterprise workflow.

Catholic Health Initiatives, CHI Health is a regional health network with a unified mission: nurturing the healing ministry of the Church while creating healthier communities. Headquartered in Omaha, the combined organization consists of 15 hospitals, two stand-alone behavioral health facilities and more than 150 employed physician practice locations in Nebraska and southwestern Iowa. Nearly 15,900 employees comprise the workforce of this network that includes 2,820 licensed beds and serves as the primary teaching partner of Creighton University's health sciences schools. In fiscal year 2013, the organization provided a combined \$130.7 million in quantified community benefit including services for the poor, free clinics, education and research. With 15 hospitals and locations stretching from Kearney, Nebraska, to Missouri Valley, Iowa, the health network is the largest in Nebraska and serves residents of Nebraska, southwest Iowa and northern Kansas.
