FOR IMMEDIATE RELEASE

Banyan Medical Systems Sponsors Interventional Cardiology Symposium in Maui, HI

Maui, HI (July 2015) Banyan Medical Systems will be sponsoring the second annual *Geoffrey O. Hartzler, MD Interventional Cardiology Symposium: Principles & Perspectives – State of the Art* July 13-15 at the Sheraton Maui.

The symposium's intended audience includes interventional as well as non-invasive cardiologists, cardiovascular and vascular surgeons, laboratory technicians and allied healthcare professionals. World-renowned physicians will be featured, focusing on the main concerns of practicing interventional cardiologists; specifically, case presentation and practical solutions to complications and difficult patient, lesion and clinical subsets.

Two of the symposium's directors, J Aaron Grantham and Barry D. Rutherford, are physicians at Saint Luke's Mid America Heart Institute in Kansas City, MO. Banyan is a proud partner of Saint Luke's, and has installed their Corridor* solution in 4 Cath labs, 2 EP Labs and multiple conference rooms within the facility.

About

Banyan Medical Systems, Inc. located in Omaha, NE, is a leading-edge medical software development and integration company dedicated to creating solutions that transform healthcare professionals' ability to access and interact with patient information. Banyan's products are designed to leverage current technology investments and improve efficiencies through a scalable and flexible, dashboard-like solution that provides physicians and other medical professionals' ubiquitous access to pertinent medical applications needed for a comprehensive patient view.

***Corridor** - Banyan's software-based integration product, Corridor, transforms the way staff delivers care by integrating multiple sources of information into one user-friendly interface; providing physicians and staff seamless access and interaction with data sources. This functionality enables Corridor to surpass competitors by its unprecedented access, collaboration, and coordination capabilities. The flexibility inherent in Corridor can prevent hospitals from future costly upgrades that other hardware-based solutions would require, protecting Banyan's clients' investments over the long term.
