FOR IMMEDIATE RELEASE

### **North Mississippi Medical Center Hybrid OR to Utilize Corridor for Patient Fall Prevention**

**Tupelo, MS** (May 6, 2015) North Mississippi Medical Center (NMMC) has gone live with the Banyan Medical Systems' Corridor care delivery platform for their patient fall prevention program. In addition, the Banyan Whiteboard enterprise workflow plugin has also deployed to maximize coordination and workflow efficiency for the facility. In 2011, Banyan also implemented the Corridor platform in the NMMC hybrid operating room.

"The Corridor expansion into two such diverse areas proves the flexibility and ubiquitous nature of the platform," says Jeff Broz, VP of Strategic Development for Banyan, "Our intent is to maximize the value for every partner on the platform."

The NMMC fall prevention program is part of a neuro unit expansion, where falls are very common.

#### **About**

Founded in 2006 and headquartered in Omaha, Nebraska, Banyan Medical Systems, Inc. is a leading-edge medical software development company that is dedicated to transforming healthcare delivery in the 21st century by solving the challenges of access, collaboration and coordination across the continuum of care.
